

Learning Support Gap

Community Education Survey Report by:
BrightFuture Education Trust

Date: 10th October 2024

Location: Yelahanka New Town (Sector
B) Bengaluru, Karnataka

Coordinates: 13.1007, 77.5963

Field volunteers conducted an assessment to understand learning challenges among school-going children in low-income households. The study focused on access to academic support, digital learning tools, and dropout risk indicators.

Target Group

Students (Classes 5-10)

Government and low-cost private schools

Households with limited access to tutoring resources

Findings

Around 65% of students lack access to after-school academic support

40% struggle with basic math and reading comprehension

Limited access to digital devices (only ~30% have smartphones for learning)

Parents unable to provide academic assistance due to work or literacy constraints

Increased risk of dropouts among students in Grades 8–10

Estimated students affected: ~250–300

Households covered: ~180

Area coverage: ~1.5 km²

Learning gaps post-pandemic still persistent

Lack of structured tutoring programs

Low student confidence and motivation

Limited awareness of free educational resources

Required:

Weekend tutoring sessions by volunteers
Basic literacy and numeracy programs
Mentorship and career awareness sessions
Donation drives for books and digital devices
