

Emergency water Scarcity Assessment - ward 12, RR Nagar

NGO Name: AquaRelief Foundation

Date of Survey: 12 April 2026

Location: Rajarajeshwari Nagar (ward 12), Bengaluru, Karnataka

Coordinates: 12.9275, 77.5150

Over the past 3 weeks, residents in ward 12 have reported severe disruption in municipal water supply. The issue has escalated due to reduced tanker availability and increased summer demand.

Observations

- 80% of households reported receiving water only once every 4-5 days
- Residents are relying heavily on private tankers, with prices increasing by 40%
- Public taps in 3 areas are non-functional
- Schools in the area have reduced operational hours due to water shortage
- Elderly population and children are most affected
- Estimated households affected: ~450
- Total individuals impacted: ~1800-2200
- Area coverage: approx 1.8 km²

Concerns

- Water availability critically low in multiple zones
- Hygiene concerns increasing (reported cases of minor infections)
- Situation likely to worsen within 1-2 weeks if unresolved

Supporting Evidence

- Dry public taps
- Residents testimonies
- Tanker receipts showing price surge

Recommended requested Action

- Immediate deployment of emergency water tankers and some volunteers for distribution
- Repair of public tap infrastructure
- Awareness campaign on water conservation
